PROFESSIONAL SUMMARY

Tech driven individual who loves to explore technologies and tools with a specialization in MERN stack. I love to work on purposeful and meaningful projects that probably add some value to my skills and knowledge as well as the product and solve already existing problems.

PROJECTS

1. SEPHORA CLONE | <https://github.com/arpitchaudhary03/SephoraProject>

An E-Commerce Web application to buy beauty & care products

Features:

- Social Login/Sign-up
- Responsive for all screen sizes
- CSS Carousels
- User authentication

Tech Stack: HTML | CSS | JavaScript

Areas of responsibility:

- Developed the Landing page integrating various animations and sliders.
- Integrated the headers, footers and other components to the application.
- Worked collaboratively on various functionalities such as payment and login/signup auth.

A collaborative project built by a team of 5 executed in 7 days.

2. TATA CLIQ CLONE | <https://github.com/arpitchaudhary03/Tata-Clig>

An E-Commerce Web application to buy various categories of products

Features:

- Social Login/Sign-up
- Bootstrap Product Sliders & Carousels
- Zoom in/out on hover animations
- Responsive for all screen sizes
- User authentication

Tech Stack: HTML | CSS | JavaScript | Bootstrap

Areas of responsibility:

- Developed the Landing page integrating various animations and sliders.
- Integrated the headers, footers and other components to the application.
- Worked collaboratively on various functionalities such as payment and login/signup auth.

A collaborative project built by a team of 6 executed in 7 days.

Team Collaboration | Quick Learner |
Helpful and Understanding | Respects
Time

3. MERN Stack CRUD Application | <https://github.com/arpitchaudhary03/app>

A CRUD application wherein admin can create, read, update, delete data

Features:

- Create Data
- Read Data
- Update Data
- Delete Data

Tech Stack: HTML | CSS | JavaScript | React | Node | Express | MongoDB | Material-UI

Areas of responsibility:

- Built the whole application from scratch. The frontend is built using React and Material-UI and Axios is used for the frontend API calling. MongoDB is used as a database and the APIs of the backend are called using Node.js. The app is deployed on Heroku as well.

ACCOMPLISHMENTS

Volunteer - Robin Hood Army

The Robin Hood Army is a volunteer-based Zero funds organization that works to get surplus food from restaurants to the less fortunate sections of society in cities across India and 14 other countries.

Volunteer - Shri Patiram Paryavaran Sanrakshan Sansthan

The Patiram Paryavaran Sanrakshan Sansthan is led by my maternal grandfather. We as a team have planted more than 50,000 plants in Jaipur, Bharatpur and Boraj with around 95% survival rate. Looking forward to making earth a lush green planet again.

INTERESTS

Badminton and Chess | Solo rides on weekends exploring myself & new places | Exploring different sites which add value to my quality of work
