## PROFESSIONAL SUMMARY

Tech driven individual who loves to explore technologies and tools with a specialization in MERN stack. I love to work on purposeful and meaningful projects that probably add some value to my skills and knowledge as well as the product and solve already existing problems.

## PROJECTS

### 1. TATA CLIQ CLONE |

https://github.com/arpitchaudhary03/Tata-Cliq

An E-Commerce Web application to buy various categories of products Features:

● Social Login/Sign-up
● Bootstrap Product Sliders & Carousels
● Zoom in/out on hover animations
● Responsive for all screen sizes
● User authentication

Tech Stack: HTML | CSS | JavaScript | Bootstrap

Areas of responsibility:
● Developed the Landing page integrating various animations and sliders.
● Integrated the headers, footers and other components to the application.
● Worked collaboratively on various functionalities such as payment and login/signup auth.

### 2. MERN Stack CRUD Application |

https://github.com/arpitchaudhary03/app

A CRUD application wherein admin can create,read,update,delete data.

Tech Stack: HTML | CSS | JavaScript | React | Node | Express |MongoDB | Material UI

Areas of responsibility:
● Built the whole application from scratch. The frontend is built using React and Material-UI
● Axios is used for the frontend API calls.
● MongoDB is used as a database and the APIs of the backend are called using Node.js.
● The app is deployed on Heroku as well.
